Baltimore Gas and Electric Chooses AUS Consultants' and Flexnova's CaseWorks product for Docket/Case Management.

MOORESTOWN, N.J. (BUSINESS WIRE – June 15, 2005) - - AUS, Inc., a consulting company for the energy and public utilities industries, today announced that Baltimore Gas and Electric Company has selected AUS and Flexnova, Inc. to implement their comprehensive docket/case management solution named CaseWorksSM.

Baltimore Gas and Electric Company (BGE), a regulated utility and subsidiary of Constellation Energy (NYSE: CEG), serves nearly 1.2 million business and residential electric customers and approximately 620,000 gas customers in Central Maryland. When BGE managers determined that there was a need for a docket/case management system to coordinate and manage the company's regulatory cases, including the often arduous data request process, they chose AUS and Flexnova's configurable case management platform designed specifically for the needs of the regulated utility industry.

"With AUS and Flexnova, we found a solid case management solution that met our greatest need - to improve efficiencies in our ongoing regulatory activities, especially in managing the time-critical data request process," said Wayne Harbaugh, Manager, Pricing and Regulatory Services. "We went with AUS and Flexnova because of their respective reputations and vast knowledge of the energy industry. The central database will create multiple efficiencies, simplify regulatory case information and provide the real time information our managers need to more effectively manage our activities," continued Harbaugh.

"CaseWorks, which was jointly developed by AUS and Flexnova, helps utilities coordinate all of the case information and myriad of documents related to a utility's filings, thereby streamlining their processes and improving the accuracy and management of regulatory proceedings," stated Andre Chon, vice president at AUS. "Given BGE's commitment to operational excellence, we are proud to have been chosen to help them strengthen their regulatory filing processes."

"We are committed to helping companies such as BGE improve the way they execute critical business processes that are unique to their industry," said Steve Rossi, president of Flexnova. "We also believe in reducing time to value by leveraging standard technologies. The time it took BGE to move CaseWorks into production for a live rate case was dramatically reduced because our tool leverages Microsoft SharePoint portal technology, a platform that BGE's IT department felt was a natural fit for their environment."

About Baltimore Gas and Electric Company: BGE is a member of Constellation Energy (NYSE: CEG), a FORTUNE 200 company based in Baltimore. Constellation Energy is the nation's largest competitive supplier of electricity to large commercial and industrial customers and the nation's largest wholesale power seller. Constellation Energy also manages fuels and energy services on behalf of energy intensive industries and utilities. It owns a diversified fleet of more than 100 generating units located throughout the United States, totaling approximately 12,500 megawatts of generating capacity. The company also delivers electricity and natural gas through the Baltimore Gas and Electric Company (BGE), its regulated

utility in Central Maryland. In 2004, the combined revenues of the integrated energy company totaled \$12.5 billion.
